**CORRECTION TO "TERMINATING PROLONGATION  
PROCEDURES"**

HAROLD H. JOHNSON

*Correction to*

“ON TERMINATING PROLONGATION PROCEDURES”

BY H. H. JOHNSON

This Journal, Vol. 10 (1960), 577-583

(Received June 8, 1961)

M. Kuranishi has kindly brought to our attention an error in Theorem 1 on page 579. Condition (2) of that theorem should be corrected to read:

“(2)  $dB_{\varphi;ij;k_1\dots k_t} \equiv 0$  modulo  $(\omega^i, \theta^\alpha)$  for all  $t$ .”

The above equation does not follow from the original hypotheses as the author indicated.

Since the interest in Theorem 1 is in its applicability as a criterion for involutiveness, it may be helpful to mention the following conditions under which (2) holds, assuming condition (1).

*Condition 1.* The  $\theta^\alpha$  and  $\omega^i$  span  $dx^1, \dots, dx^n$ .

*Condition 2.*  $\omega^i = dy^i$ ,  $i = 1, \dots, p$  and  $dB_{\varphi;ij} \equiv 0$  modulo  $(\omega^i)$ .

Under Condition 1, there are no  $\pi^\lambda$ , hence no additional variables are introduced by the prolongation process.

Under Condition 2,  $B_{\varphi;ij}$  is a function of  $y^1, \dots, y^p$  alone. Consequently  $dB_{\varphi;ij} = (\partial B_{\varphi;ij}/\partial y^k)\omega^k$ , hence  $B_{\varphi;ij;k} = (\partial B_{\varphi;ij}/\partial y^k)$  is also a function of  $y^1, \dots, y^p$  alone. In the same way every  $B_{\varphi;ij;k_1\dots k_t}$  is a function of  $y^1, \dots, y^p$  alone.

Condition 1 is satisfied in Theorem 2 on page 581. Condition 2 is satisfied in the system  $(S')$  on page 220 studied in the paper, H. H. Johnson: “On the pseudo-group structure of analytic functions on an algebra,” Proc. Amer. Math. Soc. 12 (1961), 218-224. Princeton University.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be typewritten (double spaced), and the author should keep a complete copy. Manuscripts may be sent to any one of the four editors. All other communications to the editors should be addressed to the managing editor, L. J. Paige at the University of California, Los Angeles 24, California.

50 reprints per author of each article are furnished free of charge; additional copies may be obtained at cost in multiples of 50.

---

The *Pacific Journal of Mathematics* is published quarterly, in March, June, September, and December. The price per volume (4 numbers) is \$12.00; single issues, \$3.50. Back numbers are available. Special price to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: \$4.00 per volume; single issues, \$1.25.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley 8, California.

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), No. 6, 2-chome, Fujimi-cho, Chiyoda-ku, Tokyo, Japan.

PUBLISHED BY PACIFIC JOURNAL OF MATHEMATICS, A NON-PROFIT CORPORATION

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.
