

Accelerate Your Research AND Enhance Your Classroom

You probably already know that Maple™ 11 has thousands of mathematical functions, hundreds of plotting routines, a sophisticated programming language designed for mathematics, and professional publishing tools, making it the ideal tool for your mathematical research.

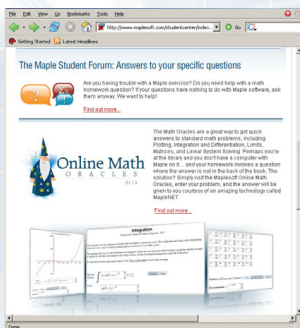

Did you also know...?

- With Clickable Calculus™ techniques, Maple's point-and-click interface makes math easy to do, easy to learn, and easy to teach.
- With Maple T.A.™ and the Maplesoft™-MAA® Placement Test Suite, students can take online placement tests, do assignments, and receive instant feedback all online. The system also makes it easy to create meaningful mathematical questions, so you can ask just what you want to ask. And the grading? All done at the click of a button!

- Maplesoft provides Clickable Calculus applications on the Teacher Resource Center, and video illustrations on the Student Help Center – a web site full of applications, training materials, question content, user forums, and more. Help is just a click away!

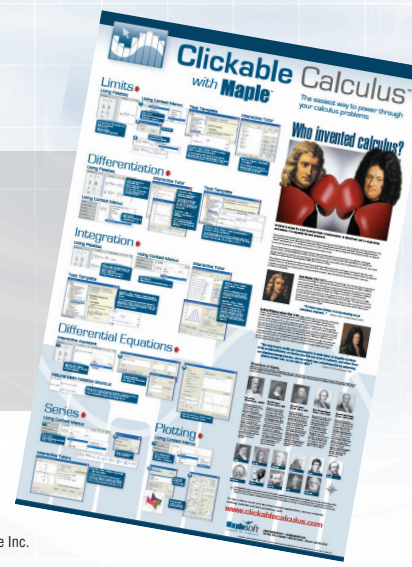

With Maplesoft, math just clicks!
