# WHAT'S NEW FOR 2021

## New Journals at MSP

In 2020, MSP is launching two new journals: *Algebraic Statistics* (AStat), and *Probability and Mathematical Physics* (PMP).

Both journals will be **freely available through the end of 2021**, and available by subscription starting in 2022. You can read more about these new journals at [msp.org/astat](https://msp.org/astat) and [msp.org/pmp](https://msp.org/pmp).

## Subscribe to MEMOCS

The journal *Mathematics & Mechanics of Complex Systems*, already published by MSP and supported by the M&MOCS Centre at the University of L'Aquila, is becoming a **subscription journal with select diamond public-access articles**. Starting in 2021:

- A number of articles will be made available free to read, subsidized by the M&MOCS Centre and with no author charges.
- The rest of the content will be available, in the first five years after publication, via subscriptions.
- Like the rest of MSP's collection, all subscription-based content will become free to read five years after publication.

**MEMOCS is not currently included in any of MSP's package options, but can be added at the listed "add to a package" prices.**

## Free and Low-Priced Access Options for Select Countries

MSP's journals are now freely available to libraries in selected countries through **Electronic Information for Libraries** (EIFL).

Additionally, MSP has begun offering a nearly 50% discount on the MSP Package to institutions in **countries of lower-middle and low income** (as classified by the World Bank).

You can read more about these initiatives, and where these options are available, at [msp.org/publications/journals](https://msp.org/publications/journals).

## Perpetual Access

We have implemented **perpetual access for all subscribers**. If your library subscribes to the MSP Package in 2021, you'll always have access to the MSP Package content that was published in 2021.
