**CORRECTION TO: "ADJOINT QUASI-DIFFERENTIAL
OPERATORS OF EULER TYPE"**

JOHN SPURGEON BRADLEY

ERRATA

Correction to

MAXIMAL ALGEBRAS AND A THEOREM OF RADÓ

I. GLICKSBERG

Volume 14 (1964), 919–941

Professor Paul Civin has kindly pointed out that in Theorems 3.2, 3.5, 4.8(i), and 5.2 of this paper it is tacitly assumed that $\rho_x^{-1}(\partial_A) = \partial_A$ (see, e.g., the first paragraph on p. 925) and thus in each of these results the hypothesis that *for each relatively maximal algebra A_x no element of $\mathcal{M}_A \setminus \partial_A$ extends an element of ∂_A* should be added.

However, when local approximability of f is assumed on all of $\mathcal{M}_A \setminus f^{-1}(0)$ rather than on $\mathcal{M}_A \setminus (\partial_A \cup f^{-1}(0))$ in 3.2 (or the analogous sets in the later results) this additional hypothesis is unnecessary, as is easily seen. For just this reason the added hypothesis is not needed in 4.4, 4.5, 5.3, 5.4 (and the final assertion of 5.2), and these results are correct as stated.

Correction to

SOME GENERAL PROPERTIES OF MULTI-VALUED FUNCTIONS

RAYMOND E. SMITHSON

Volume 15 (1965), 681–703

This paper was written while the author was at the U. S. Naval Ordnance Test Station, China Lake, California. He is now at the University of Florida.

Correction to

ADJOINT QUASI-DIFFERENTIAL OPERATORS OF EULER TYPE

JOHN S. BRADLEY

Volume 16 (1966), 213–237

“Wherever the symbol \tilde{z} appears (with or without a subscript) it

should be replaced by $\overset{\circ}{Z}$, and \tilde{Z} should be replaced by $\overset{\circ}{Z}$. The symbols $\tilde{\mathfrak{X}}_m$ and $\tilde{\mathfrak{X}}_m^{\circ}$ should be replaced throughout by $\overset{\circ}{\mathfrak{X}}_m$ and $\overset{\circ}{\mathfrak{X}}_m^{\circ}$, respectively; however, $\tilde{\mathfrak{X}}_n$ and $\tilde{\mathfrak{X}}_n^{\circ}$ remain unchanged. The first equation of line 14 page 235 should be " $\overset{\circ}{\mathfrak{X}}_n = \tilde{\mathfrak{X}}_n$."

Correction to

DUALITY AND TYPES OF COMPLETENESS IN LOCALLY CONVEX SPACES

WILLIAM B. JONES

Volume 18 (1966), 525-544

Proposition 2.14 is an obvious consequence of Lemma 2.8.

p. 538, line 5: The second equality is false in general for all α (see [4]).

Some misprints:

- | | |
|--------|--|
| p. 526 | § 2 should start " $(\alpha, \beta) - \dots$ "
line 3 of § 2, " α " instead of " a " |
| p. 528 | last line, remove final " $\}$ " |
| p. 532 | line 14, second " ε " should be " ϵ " |
| p. 535 | line 2, should read
$\dots \leq \frac{\varepsilon}{r} (r - \dots$ |
| p. 537 | line 8, second " $=$ " should be " $-$ " |
| p. 541 | line 9, " λ_0 " instead of " 1_0 " |

Correction to

UNIQUENESS AND EXISTENCE PROPERTIES OF BOUNDED OBSERVABLES

S. P. GUDDER

Volume 19 (1966), 81-93

The author recently discovered that the proof of the corollary to Theorem 4.5 is incorrect, thus invalidating Theorem 4.6. We show now that Theorem 4.6 is still true for a class of observables with infinite spectra and prove a generalization of Theorem 4.5.

An observable x is *semi-bounded above (below)* if there is a number

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be typewritten (double spaced). The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. It should not contain references to the bibliography. Manuscripts may be sent to any one of the four editors. All other communications to the editors should be addressed to the managing editor, Richard Arens at the University of California, Los Angeles, California 90024.

50 reprints per author of each article are furnished free of charge; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is \$ 8.00; single issues, \$ 3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: \$ 4.00 per volume; single issues \$ 1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley 8, California.

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), No. 6, 2-chome, Fujimi-cho, Chiyoda-ku, Tokyo, Japan.
