Vol. 55, No. 2 October 1974

Correction to

ON AN INVERSION FOR THE GENERAL MEHLES-FOCK TRANSFORM PAIR

P. ROSENTHAL

Volume 52 (1974), 539-545

On p. 540, 543 we stated $h''(t)$, $c^{(j)}(x)$ were of bounded variation on the infinite intervals $\infty \geqq t \geqq$, $\infty \geqq x \geqq 0$, this implied the above functions could be written as the sum of two monotonic functions with certain properties, a result used in our proof. However our proof (implicit in our paper) that the above functions are of bounded variation on the infinite interval is in error. In order to obtain the desired decomposition used in our paper, part 1 of Theorem 1 should now read $g_1(y)$ is three times differentiable, part 2 should read $n = 0, 1, 2, 3$, part 1 of Theorem 2 should include $f_1''(x)$, part 2 should include $f'' = O(x^{-1-\varepsilon})$. The proofs on p. 540, 543 still apply and we then conclude $h'''(t)$, $c^{(j)'}(x)$ are absolutely integrable on the infinite interval, we thus satisfy the conditions of a theorem on p. 11, 12 in 'Lectures on Fourier Integrals' by S. Bochner and then conclude $h''(t)$, $c^{(j)}(x)$ admit the desired decomposition used and stated in our paper on p. 540, 543. Hence the conclusions of Theorem 1, 2 Corollaries 1, 2 still apply as well as the closing remarks in our paper.

We also note the formulas $(1-w)^{-(1/2+k)}$, p. 540, $(\cosh h\ t\text{-}\cosh s)^{-1/2-k}$,

$\int_1^A |g(x)|\,dy$, p. 542 should $(1-w)^{-(1/2-k)}$, $(\cosh t\text{-}\cosh s)^{-1/2-k}$,

$\int_1^A |g(y)|\,dy$, on p. 543 F should contain $\cosh t$ not $\cosh t$.

WHEN ARE PROPER CYCLICS INJECTIVE

CARL FAITH

Volume 45 (1973), 97-112

There appear a number of typos:

(a, b) indicates page a, line b; $A \mid B$ means replace A by B
(97, 2) ring PCI | right PCI
(98, −18) R-module | $\hat{R}$-module
(100, −16) $Ry = R(1 - e) \mid \hat{R}y = \hat{R}(1 - e)$
(109, 20) $R \mid \hat{R}$
(109, 22) cyclic right R-module | cyclic right $\hat{R}$-module
(109, −2) sepic | epic
(110, 8) when $Q = R$. | when $Q \neq R$.

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. Items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in triplicate, may be sent to any one of the editors. Please classify according to the scheme of Math. Reviews, Index to Vol. **39**. All other communications should be addressed to the managing editor, or Elaine Barth, University of California, Los Angeles, California, 90024.

The Pacific Journal of Mathematics expects the author's institution to pay page charges, and reserves the right to delay publication for nonpayment of charges in case of financial emergency.

100 reprints are provided free for each article, only if page charges have been substantially paid. Additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is issued monthly as of January 1966. Regular subscription rate: $72.00 a year (6 Vols., 12 issues). Special rate: $36.00 a year to individual members of supporting institutions.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.
