**CORRECTION TO: "A CHARACTERISTIC SUBGROUP OF A  
GROUP OF ODD ORDER"**

ZVI ARAD AND GEORGE ISAAC GLAUBERMAN

Correction to

SUBORDINATION THEOREMS FOR SOME CLASSES OF  
STARLIKE FUNCTIONS

ROGER BARNARD AND JOHN L. LEWIS

Volume 56 (1975), 333-366

5 lines from bottom of page 335 the following theorem should be inserted:

**THEOREM 2.** *Let  $\alpha, d, M$ , and  $F$  be as in Theorem 1. Let  $F^*(\cdot, d, M) = \lim_{\alpha \rightarrow 0} F(\cdot, \alpha, d, M)$ . Then  $F^* \in S^*(d, M)$  has the following properties:*

Correction to

A CHARACTERISTIC SUBGROUP OF A GROUP  
OF ODD ORDER

Z. ARAD (ARDINAST) AND G. GLAUBERMAN

Volume 56 (1975), 305-319

Part of the proof of part (b) of Lemma 1 on page 308 is incorrect and should be replaced by the following argument:

Since  $\alpha$  generates  $F$  over  $Z_p$ , it follows that  $1, \alpha, \alpha^2, \dots, \alpha^{m-1}$  forms a basis of  $F$  over  $Z_p$ . Now, the trace map from  $F$  to  $E$  is onto and is given by  $T(x) = x + x^{p^k}$ . Therefore, it follows that

$$T(\alpha^i) = \alpha^i + \alpha^{ip^k} = \alpha^i + \alpha^{-i} \quad \text{for } i = 0, 1, \dots, m-1,$$

and that these elements span  $E$  over  $Z_p$ , although they are not linearly independent.

Take  $f \in N$  and  $w, w' \in W$  as in (b). If  $w = 0$ , then  $f(w, w') = 0$  as desired. Assume that  $w \neq 0$ . Then there exists  $\beta \in E$  such that  $w' = w\beta$ . Take  $b_0, b_1, \dots, b_{m-1} \in Z_p$  such that

$$\sum_{0 \leq i \leq m-1} b_i(\alpha^i + \alpha^{-i}) = \beta.$$

The rest of the argument follows as before.

---

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Please do not use built up fractions in the text of your manuscript. You may however, use them in the displayed equations. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. Items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in triplicate, may be sent to any one of the editors. Please classify according to the scheme of Math. Reviews, Index to Vol. **39**. All other communications should be addressed to the managing editor, or Elaine Barth, University of California, Los Angeles, California, 90024.

The Pacific Journal of Mathematics expects the author's institution to pay page charges, and reserves the right to delay publication for nonpayment of charges in case of financial emergency.

100 reprints are provided free for each article, only if page charges have been substantially paid. Additional copies may be obtained at cost in multiples of 50.

---

The *Pacific Journal of Mathematics* is issued monthly as of January 1966. Regular subscription rate: \$72.00 a year (6 Vols., 12 issues). Special rate: \$36.00 a year to individual members of supporting institutions.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.
