**CORRECTIONS TO: "SUBSEQUENCES AND  
REARRANGEMENTS OF SEQUENCES IN  $FK$  SPACES"**

ROBERT M. DEVOS

Theorem 14 is false as stated. We will show elsewhere that a positive parabolic function  $v$  on  $(-1, 1) \times (0, 1)$  has the integral representation given, for a finite measure  $\alpha$ , if and only if  $\lim_{t \rightarrow 1^-} v(0, t) < \infty$ . Here we take  $p_0 = (0, 1)$ .

We also note the following errors. Theorem 5 should read " $B|I = C(I)$ " instead of " $B|I$  dense in  $C(I)$ ". On p. 347 the definition  $B_n$  should read: "all  $C^2$  functions which satisfy  $u_{xx}(x, y) - u_{yy}(x, y) = 0$  and  $u_y(x, 0) = 0$ ".

## SUBSEQUENCES AND REARRANGEMENTS OF SEQUENCES IN $FK$ SPACES

ROBERT DEVOS

Volume 64 (1976), 129-135

In Lemma 1 and all subsequent results, whenever we take a sequence in  $E \setminus l^p$  we need take it in  $E \setminus (l^p \oplus \{e\})$ . This error was pointed out by R. A. Shoop.

## EXACT FUNCTORS AND MEASURABLE CARDINALS

ANDREAS BLASS

Volume 63 (1977), 335-346

Professor V. Trnková and J. Reiterman have informed me that the main results in [1] are contained in or easily deducible from [3] and that the example constructed in the last paragraph of [1] was also obtained in [2].

---

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Please do not use built up fractions in the text of the manuscript. However, you may use them in the displayed equations. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. Items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and journal, rather than by item number. Manuscripts, in triplicate, may be sent to any one of the editors. Please classify according to the scheme of Math. Reviews, Index to Vol. 39. All other communications should be addressed to the managing editor, or Elaine Barth, University of California, Los Angeles, California, 90024.

The Pacific Journal of Mathematics expects the author's institution to pay page charges, and reserves the right to delay publication for nonpayment of charges in case of financial emergency.

50 reprints to each author are provided free for each article, only if page charges have been substantially paid. Additional copies may be obtained at cost in multiples of 50.
