Volume 138 (1989), 151–168

The proof of Proposition 11 of this paper contains an error in the stage of proving that $C(\sigma)$ is finitely generated over C . We present here a correct proof.

Proof. Since σN is finitely generated over K and σ is strong, $N\sigma N = NC(\sigma)$ is finitely generated over N . Hence, there exist elements $\gamma_1, \dots, \gamma_s$ of $C(\sigma)$ such that $NC(\sigma) = N(\gamma_1, \dots, \gamma_s)$. For each element c of $C(\sigma)$, there exist polynomials F and G in $N[X_1, \dots, X_s]$ such that

$$(1) \quad F(\gamma_1, \dots, \gamma_s) - cG(\gamma_1, \dots, \gamma_s) = 0$$

and $G(\gamma_1, \dots, \gamma_s) \neq 0$. Among the monomials of $\gamma_1, \dots, \gamma_s$ in the equation (1), we choose linearly independent elements c_1, \dots, c_r over C and rewrite (1) in the form

$$(2) \quad \sum_{i=1}^r c_i a_i - c \left(\sum_{i=1}^r c_i b_i \right) = 0$$

where $a_1, \dots, a_r, b_1, \dots, b_r \in N$ and $\sum_{i=1}^r c_i b_i \neq 0$. If $\{\alpha_1, \dots, \alpha_t\}$ is a maximal set of linearly independent elements over C in $\{a_1, \dots, a_r, b_1, \dots, b_r\}$, then a_i and b_i ($i = 1, \dots, r$) are represented by

$$a_i = \sum_{j=1}^t a_{ij} \alpha_j \quad (a_{i1}, \dots, a_{it} \in C)$$

and

$$b_i = \sum_{j=1}^t b_{ij} \alpha_j \quad (b_{i1}, \dots, b_{it} \in C).$$

By (2), we have

$$\begin{aligned} 0 &= \sum_{i=1}^r c_i \left(\sum_{j=1}^t a_{ij} \alpha_j \right) - c \left(\sum_{i=1}^r c_i \left(\sum_{j=1}^t b_{ij} \alpha_j \right) \right) \\ &= \sum_{j=1}^t \left(\sum_{i=1}^r c_i a_{ij} - c \left(\sum_{i=1}^r c_i b_{ij} \right) \right) \alpha_j. \end{aligned}$$

Since N and $C(\sigma)$ are linearly disjoint over C , $\alpha_1, \dots, \alpha_t$ are linearly independent over $C(\sigma)$ and thus

$$(3) \quad \sum_{i=1}^r c_i a_{ij} - c \left(\sum_{i=1}^r c_i b_{ij} \right) = 0 \quad (j = 1, \dots, t).$$

Suppose $\sum_{i=1}^r c_i b_{ij}$ ($j = 1, \dots, r$) are all equal to zero, then

$$b_{ij} = 0 \quad (i = 1, \dots, r, j = 1, \dots, t)$$

since c_1, \dots, c_r are linearly independent over C . Thus,

$$\sum_{i=1}^r c_i b_i = \sum_{i=1}^r c_i \left(\sum_{j=1}^t b_{ij} \alpha_j \right) = 0,$$

and this contradicts $\sum_{i=1}^r c_i b_i \neq 0$. Therefore, there exists at least one index k such that $\sum_{i=1}^r c_i b_{ik} \neq 0$. Consequently, by (3),

$$c = \frac{\sum_{i=1}^r c_i a_{ij}}{\sum_{i=1}^r c_i b_{ij}} \in C(\gamma_1, \dots, \gamma_s).$$

ACKNOWLEDGMENTS

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced (not dittoed), double spaced with large margins. Please do not use built up fractions in the text of the manuscript. However, you may use them in the displayed equations. Underline Greek letters in red, German in green, and script in blue. The first paragraph must be capable of being used separately as a synopsis of the entire paper. In particular it should contain no bibliographic references. Please propose a heading for the odd numbered pages of less than 35 characters. Manuscripts, in triplicate, may be sent to any one of the editors. Please classify according to the scheme of Math. Reviews, Index to Vol. 39. Supply name and address of author to whom proofs should be sent. All other communications should be addressed to the managing editor, or Elaine Barth, University of California, Los Angeles, California 90024-1555-05.

There are page-charges associated with articles appearing in the *Pacific Journal of Mathematics*. These charges are expected to be paid by the author's University, Government Agency or Company. If the author or authors do not have access to such Institutional support these charges are waived. Single authors will receive 50 free reprints; joint authors will receive a total of 100 free reprints. Additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is issued monthly as of January 1966. Regular subscription rate: \$190.00 a year (5 Vols., 10 issues). Special rate: \$95.00 a year to individual members of supporting institutions.

Subscriptions, orders for numbers issued in the last three calendar years, and changes of address should be sent to Pacific Journal of Mathematics, P.O. Box 969, Carmel Valley, CA 93924, U.S.A. Old back numbers obtainable from Kraus Periodicals Co., Route 100, Millwood, NY 10546.

The Pacific Journal of Mathematics at P.O. Box 969, Carmel Valley, CA 93924 (ISSN 0030-8730) publishes 5 volumes per year. Application to mail at Second-class postage rates is pending at Carmel Valley, California, and additional mailing offices. Postmaster: send address changes to Pacific Journal of Mathematics, P.O. Box 969, Carmel Valley, CA 93924.
