Welcome to the *Tunisian Journal of Mathematics*

The Tunisian Journal of Mathematics (TJM) is an international publication organized by the Tunisian Mathematical Society and published in electronic and print formats by MSP (Mathematical Sciences Publishers) in Berkeley. It publishes research articles in all areas of mathematics. These will be selected by a distinguished, international board of editors (see next page) based on outstanding quality and interest, and according to the highest international standards.

The purpose of TJM is the advancement of mathematics. Editors evaluate submitted papers strictly on the basis of scientific merit. All articles submitted to this journal are peer-reviewed. The TJM uses single-blind peer review, which means that reviewers know who the authors of the manuscript are, but the authors do not know who the reviewers are.

The African continent is increasingly interested in scientific development, particularly in mathematics. The Tunisian Mathematical Society was founded in 1992 and is a permanent institutional member of the International Mathematical Union. It plays a major role in stimulating and sustaining high level mathematical research in Tunisia and its surrounding region. With the launch of this journal, the Tunisian Mathematical Society contributes to the development in Africa of scientific research meeting high international standards.

The TJM editorial board invites mathematicians from all over the world to take part in this stimulating project by submitting high-level research articles. Submissions can be made at https://ef.msp.org/submit/tunis.
